In the broader sense, the phrase can also imply the ongoing process of adapting or aligning one's offerings or strategies to current market conditions, though this is more of a figurative use.

Technical Explanation in Finance

In futures trading, "marking to market" is a routine process where the gains and losses are calculated daily based on the closing prices. This process ensures that the account reflects the true market value of open positions, which:

- Protects both parties from excessive risk.
- Ensures timely settlement of gains and losses.
